

PREMION FANS

Spruce up your interiors with
Crompton's Premium & Designer
range of fans

AURA2

Aura2 comes with a 5 year warranty powered by Duratech technology. Duratech uses premium components, designed to deliver a superlative performance over the years.

Here's a quick look at the five key components that form the core of the Duratech technology.

Duratech comprises of:

High Endurance Box Capacitor

Aura's high-endurance box capacitor, with a patented adapter, ensures superior performance over a longer period as compared to ordinary oil-filled tube-type capacitors.

2 - Piece Construction

Unlike ordinary fans, which use a 3-piece construction, the 2-piece construction of our fans makes them robust, and less prone to vibration and noise. The construction also gives the fan a pleasing appearance, since there is no visible gap between the top and bottom motor-housing segments.

High Grade EMQ Bearing

EMQ bearings used for the Aura motor are the highest-grade bearings available for fans. They are silent and smooth, and have the additional advantage of reduced friction and vibration.

Dual Coat Copper

Dual-coat copper, used in motor windings, offers double protection, ensuring better insulation and abrasion resistance when subjected to high temperatures and sudden overloads. This results in longer durability as compared to ordinary copper wire.

High Standard CRNGO Steel

Aura fans use cold-rolled non-grain-oriented steel (CRNGO), which is highly compatible with electric motors. The composition and the thickness of the steel ensures fan durability and efficiency.
