and counting

Crompton is a leading consumer durable company in India with a 75+ years of brand legacy. As of February 2016, it is an independent company under professional management having 2 business segments – Lighting and Electrical Consumer Durables. The company markets its products under the “Crompton” brand name in India and select export markets providing its customers over a 10,000 SKUs.

Crompton is synonymous with quality, reliability and performance. Millions of Indians rely on Crompton products as they are robust, beautiful and being meticulously designed. It reflects the end consumer's personality and lifestyle. Crompton strives to create aesthetically appealing styles with the highest quality standards.

“Once a Crompton consumer,  
always a Crompton consumer.”

## PROFESSIONAL LIGHTING

We have over 60 glorious years of operational experience. Our experience in the lighting industry is all thanks to our heavy investment in product testing and gathering data on consumer needs. We combine this knowledge with our technological leadership and have emerged as one of the top lighting players in the country. Our products are superior and advanced which is why we have become one of the most sought after brands in the lighting space.

Our offering in the B2B luminaire division is vast and varied. We provide tailor-made luminaire for every space. Our luminaires not only provide safety, but also bring the architectural wonder and grandeur of a particular space. Our luminaire solutions are truly multifaceted due to the nature of their operations.

## MANUFACTURING PLANT

Crompton has state-of-the-art manufacturing plants that use only the latest technology in manufacturing every Crompton product. We work with the most brilliant minds to keep innovating and revolutionizing the lighting industry. Our manufacturing process is very thorough and detailed; we ensure that every product goes through a strict test before it reaches our beloved customers. Our manufacturing units are our strength and pride. Special mention to our ISO NABL certified plants at Baddi and Baroda that manufacture high intensity discharge lamps, general lighting service lamps, glass shells and much more. We have also received a DSRI certification for our robust in-house Research and Development Unit.

## AWARD & CERTIFICATES

To have our work recognized is a matter of pride and a great confidence booster to keep shattering glass ceilings.

## INNOVATIVE TECHNOLOGY

At Crompton, we brainstorm with the brightest minds and work together to develop the best lighting solutions for our customers. Our finished products are a reflection of our lighting knowledge which we refresh year upon year. This thinking has given birth to some innovative new lighting technologies.

## CONNECTED LIGHTING

Connected lighting is a powerful lifestyle changing solution. It enhances efficiency by using data-driven insights. Crompton's lighting management software (LMS) can be accessed through a smart phone or a tablet that collects data from range of devices using Internet of Things.

This solution illuminates workspaces using information such as occupancy, temperature, air quality and energy consumption. Every luminaire acts as a communicating node. It does more than just light up a workspace; it acts as the backbone of smart infrastructure.

## HUMAN CENTRIC LIGHTING FOR INDOOR SPACES

Crompton understands the importance of personal well being, as it is linked to their productivity level. Human centric lighting essentially changes the CCT (Correlated Color Temperature) depending on the time of day and the lighting changes from a soothing dim to an alert bright, whereby soothing the eyes, improving work efficiency and concentration levels. In other words, it mimics natural daylight. Therefore, this solution is apt for an office having low natural light or offices where work happens at night.

## RF CONNECTED LIGHTING FOR INDOOR SPACES

RF (Radio Frequency) connected lighting has redefined indoor lighting solutions. These luminaires communicate using air, with a wireless frequency band. These luminaires work on Free RF band, which is supported by most digital handsets such as wall mounted tablets and mobile applications. It also has a daylight sensor and a motion sensor in-built which enables energy savings and efficiency.

Switch to remote control luminaires to save energy, personalize workspaces, increase comfort and productivity. As for cost, cut down operation and maintenance expenses instantly with these smart luminaires. These lights have the ability to detect occupancy which enables better facility management and BMS (Business Management System) integration at a granular level of a building, wing, floor or individual fixture.

## Indoor Lighting

Crompton's sleek, elegant and modern indoor lighting has the power to change the look, feel and mood of an office, residential and commercial space. Some of our indoor lighting products include battens, linear lighting, downlighter, COB spots, decorative luminaires, premium 2x2 tile, edge lit panel and LED batten. Our products are energy efficient and provide superior light output. This lighting also provides a pleasant, human-centric work environment to maximize employee productivity.

## LED Linear Light VOGUE HCL 40W

Vogue is an elegant suspended lighting solution with 52mm width and 75mm height. The clean design and high luminance level makes it ideal for corporate offices and institutions.

# THANK YOU!

## HOW CAN YOU BE A PART OF US ?

An Environmentally-friendly alternative is now our friend. Along with Jayadev, small solutions can later become a revolution to society. Team Jayadev is now much stronger by having you on board. Together, we can save Mother Nature little by little, come on!
